

2.2.1 – The institution assesses the learning levels of the students and organizes special Programmes for Advanced learners and Slow learners.

Our college has implemented an effective monitoring system for a better and effective relationship between the students and teachers. A group of students is being allotted under the guidance of each staff members, and guidance is given to the students regarding academic and personal problems. The one-to-one student mentors are fully aware of each student's semester level performance, and they maintain their attendance percentage and CIA.

Through this system, students are motivated to develop their study skills and overcome their problems in their daily life. Student monitory system helps the staff to identify the slow learners and irregular students, and the college provides special counselling as well as deeper attention to them. Students know their values and they move on to achieve their goals with the help of special classes and attempt many tests.

Our institution provides bridge courses for improving their academic performance and also their life skills. The college gives much attention to the slow learners and special attention to the advanced learners. Advanced learners are motivated to move on to the next level. Their learning activities are enriched with a host of special lectures, online courses, enhanced tests and constant motivation. Many such advanced learners of the college have come out with flying colours in the university exams, as testified by their top ranks.
